DIV OF WATER RESOURCES
RECEIVED

ANNUAL REPORT

Operation Name: *Tim @ hanthavone*

Date Submitted: *9/24/14*

1. Number and types of animals on site.	Types: <i>Broilers</i>	Number: <i>115,000</i>	
2. Estimated amount of litter, litter, compost and/or process wastewater generated in the previous calendar year.	Amount: <i>800 Ton</i>		
3. Estimated amount of litter, litter, compost and/or process wastewater transferred to a 3rd party in the previous calendar year.	Amount Transferred: <i>N/A</i>		
4. Total number of acres for land application covered by the nutrient management plan.	Acres: <i>1000 Acres</i>		
5. Total number of acres under control of the landowner that were used for land application of litter, litter, compost and/or process wastewater in the previous calendar year.	Acres: <i>3000 Acres</i>		
6. Summary of all litter, litter and/or process wastewater discharges to waters of the state from the production area that have occurred in the previous calendar year, include date, time and approximate volume.	Date: <i>9/24/14</i>	Time:	Volume:
7. The current version of the Comprehensive Nutrient Management Plan was developed and/or approved by a certified nutrient management planner.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No Comments:

APPENDIX B

Agreement for the Removal of Litter, Manure and/or Process Wastewater from an AFO

The conditions listed below help to protect water quality. These conditions apply to litter, manure and/or process wastewater removed from an AFO. This agreement is for (amount of waste removed, i.e. tons, gallons, etc.)

800 Tons of waste, removed on (date) 9-25-14, from the facility owned by Tim Chanthavone 2393 Asbury Rd and located at Manchester, TN 37355.

- A. The litter, manure and/or process wastewater must be managed to ensure there is no discharge of litter, manure and/or process wastewater to surface or groundwater.
- B. When removed from the facility, litter, manure and/or process wastewater should be applied directly to the field or stockpiled and covered with plastic or stored in a building.
- C. Litter, manure and/or process wastewater must not be stockpiled near streams, sinkholes, wetlands or wells.
- D. Fields receiving litter, manure and/or process wastewater should be soil tested at least every two or three years.
- E. A litter, manure and/or process wastewater nutrient analysis should be used to determine application rates for various crops.
- F. Calibrate spreading equipment and apply litter, manure and/or process wastewater uniformly.
- G. Apply no more nitrogen or phosphorus than can be used by the crop.
- H. A buffer zone is recommended between the application sites and adjacent streams, lakes, ponds, sinkholes and wells. The following non-application buffer widths, taken from NRCS Conservation Practice Standard 590, should be used when applicable:

Object, Site	Buffer Width, feet	Situation
Wells	150	Up-slope of application site
	300	Down-slope of application site, if conditions warrant application
Waterbody	30-100	Depending on the amount and quality of vegetation and slope
Public Use Area	300	All
Residences	300	Other than producer

- I. Do not apply litter, manure and/or process wastewater when the ground is frozen, flooded, saturated or on steep slopes subject to flooding, erosion or rapid runoff.
- J. Cover vehicles hauling litter, manure and/or process wastewater on public roads.
- K. Keep records of locations where poultry litter will be used as a fertilizer.

I, Ross Pinkies am the person receiving litter, manure, and/or
(name)

process wastewater and do understand the conditions listed above.
